

In the meantime, between pondering the thoughts of whether to “invade Hungary on horseback [nonchalantly and joyously (with love)] for the purposes of using this as a front; for restoring sanity worldwide, et cetera. I SHOULD return to my first ‘paper’ the most useful, as-well as capable and able ‘unified theory of the classical and quantum sciences of physical.

Or steal a submarine.

Describe my early appreciation of the very clear existential similarity of to the temporal, gravity and also of velocity, as I’d encountered as proof in my early inquisition to mathematics.

That of the very plain to see working of the transfers or translations of energy [mechanical] or in with respect to velocity, interrelated without the slightest question.

Etc.

Also my second significant earth-rocking wonder, the- and in my personal opinion the most sensible without considerable theoretical opposition, in any practical viable sense- means of our second (to my best knowing- departure to the unknown regions of our Universe. Of the vast spaces of this bouncing of fancy and whim, in discovery; Cosmos which we inhabit. By via the manipulation of OUR perception of the sense of time, by a way which I shall show in time. Wear a condom all day every-day. Btw. ;-)

Also sane means of collecting and translating energy, et cetera.
